

Celebrating 65 Years of
"Pride in the Electrical Trade"

**THE WISCONSIN ELECTRICAL TRADES COUNCIL AND
THE ELECTRICIAN, INC. ARE TEAMING UP TO BRING THIS
IMPORTANT TRAINING SEMINAR TO A LOCATION NEAR YOU!**

Understanding Often Overlooked Jobsite Electrical and Safety Requirements

Here is an excellent opportunity to gain the in-depth knowledge of NEC code requirements and NFPA 70E safety protocols that will improve the accuracy of your project estimates, increase your credibility as a contractor and increase your customer's confidence when your electricians are on the job site.

- > Do you perform electrical work in multi-use buildings or install 1000A and larger services at 480V? Are you aware that **the NEC requires engineering level assessment & testing** when planning this work?
- > Did you know NFPA 70E states a facility (host employer) is **required to make you and your employees aware of any hazards** related to working with their electrical systems **before you begin to install, modify, maintain, or service equipment**?
- > Did you know **your employees are required to be informed and trained to follow all safety protocols established by the facility where the work is being performed**?
- > Do your service agreements with a host employer or industrial facility **require work on energized equipment**? Are you aware of **what it means to be "qualified" to work on energized equipment**?

These and many other questions will be addressed in an intense six-hour seminar that goes beyond knowing how to "meet the code"! This in-depth training session will explore the fundamentals of energy exposure, risk assessment, PPE use, and protocols needed to meet an often overlooked relationship between the 2017 NEC and 2021 NFPA 70E. Your knowledge of how these two standards work together to provide a safe and efficient installation will provide for increased credibility and improve the working relationship when designing and completing projects for your commercial and industrial customers.

Attendance will provide a Certificate of Completion to meet safety training requirements & **6.0 CEUs** toward renewal or maintenance of a Wisconsin Electrician, Electrical Inspector, or UDC credential.

This 6-hour seminar will be presented in six locations on different dates around the state for your convenience. Seminar time will be 9:00 AM to 4:30 PM in all locations. Please see the other side of this sheet for a registration form along with a list of dates and locations.

Chuck Fox, CESCP & Bill Neitzel are instructors for this seminar. For more information on electrical safety programs from *The Electrician, Inc.* contact Chuck Fox at 608-212-0508 or ChuckF@TheElectricianInc.com

Presented with the help & support of these fine businesses!
